## EDUCATION

---

### B-Tech in Computer Science and Engineering

*Vishnu Institute of Technology (VITB), Bhimavaram*

2021–Present

CGPA: 8.54\*

### Board of Intermediate Education

*Tirumala Junior College, Bhimavaram*

2019–2021

Percentage: 96.6%

## PROFILES

---

**LinkedIn:** [linkedin.com/kanchustambham-dharanesh](https://www.linkedin.com/kanchustambham-dharanesh)

**LeetCode:** [leetcode.com/dharaneshk2003](https://leetcode.com/dharaneshk2003)

**Codechef:** [codechef.com/dharanesh123](https://www.codechef.com/dharanesh123)

**HackerRank:** [hackerrank.com/dharaneshk2003](https://www.hackerrank.com/dharaneshk2003)

**CodingNinjas:** [naukari.com/kanchustambham-dharanesh](https://www.naukari.com/kanchustambham-dharanesh)

## TECHNICAL SKILLS

---

**Programming Languages:** Python, Java, HTML, CSS, JavaScript, SQL

**Technologies/Frameworks:** React.js, React Native, Next.js, Node.js, Express.js, Bootstrap, Tailwind CSS

**Web Development Tools:** VS Code, Github, Github Desktop, Postman, Android Studio

**Cloud/Databases:** MongoDB, Firebase, Supabase, Convex

## PROJECTS

---

### **Ticketer** | *Next.js, Convex*

- Project link – [ticketer](#)
- Developed a seamless SaaS platform for event ticketing, streamlining reservations and ticket sales. Designed a user-friendly interface with real-time updates and scalable management for high-traffic events.
- Built a robust backend with **Convex** for real-time data synchronization, secure **APIs** for ticket management, and efficient handling of high-traffic scenarios using **Cron**.

### **Yelp-Camp** | *Bootstrap, EJS, Node.js*

- Project link – [yelp-camp](#)
- Designed an online website to discover campgrounds, share reviews, and experiences, with a focus on seamless exploration and feedback.
- Built a responsive interface using **Bootstrap** and **EJS** to browse, create, and review campgrounds with a clean, mobile-friendly design.
- Implemented a **RESTful API** with **Node.js** and **Express**, incorporating user authentication, **CRUD** operations for campgrounds, and review management. Stored data in **MongoDB** and managed image uploads using **Cloudinary**.

### **Business-Directory** | *React-Native, Firebase*

- App link – [business-directory](#)
- Developed an interactive mobile app that lets users explore various business fields, create and grow their businesses, and receive client reviews to foster growth.
- Utilized **Firebase** for real-time database management and **Clerk** for secure authentication and hosting, enabling dynamic updates and instant data synchronization.

## CERTIFICATIONS

---

- **Udemy:** The Web Developer Bootcamp 2024 [[Certificate](#)]
- **Coursera:** Java Programming : Solving Problems with Software [[Certificate](#)]
- **Coursera:** Programming for Everybody (Getting Started with Python) [[Certificate](#)]
- **HackerRank:** SQL(Basic) [[Certificate](#)]

## ACHIEVEMENTS

---

- Achieved a **5-star** Code Badge in **Python** on HackerRank, demonstrating expertise in problem-solving and proficiency in coding challenges.
- Earned a **4-star** Code Badge in **Java** on HackerRank, reflecting proficiency in coding challenges and problem-solving.
- Secured a global rank of **1828** in CodeChef **Starters 131**, reflecting strong problem-solving skills and competitive programming expertise.
- Obtained a Achiever Badge in Coding Ninjas.
